To Whom It May Concern:

I have worked with Stephen Mandell on a few major software projects when he was the manager of South Shore Medical. He outsourced the programming of a patient referral system as well as a blood test reporting system to my company. He handled all of the training and support, and did a fantastic job.

He was able to quickly train people who were not computer literate, getting them to understand and use our programs with no problems. The system is still in use and although Steve is no longer with that company, they are still successfully using the training program that Steve created. He was a pleasure to work with.

Very truly yours,

Al Musella, DPM  
President
