Life and Health Insurance Advisor Spring 2022 Volume 15, Number 1

Never Outlive Your Savings with Longevity Annuities

The Centers for Disease Control and Prevention estimates that the average 65-year-old will live at least another 20 years, which is six years more than what life expectancy was in 1950. While this is great news, it does present a financial challenge —

how to ensure that your retirement savings will last a lifetime. [Read on for details.](#)

Lose Weight to Save On Insurance

If you are already finding it hard to keep your New Year’s promise to lose weight this year, maybe this will inspire you. [Read on for details.](#)

Not Getting Vaxxed? Here’s What To Do if You Lose Your Job

As we enter year three of the COVID-19 pandemic, experts are still encouraging people to get the Pfizer-BioNTech and Moderna COVID-19 vaccine and booster shots because they lessen the possibility of needing hospitalization if they get infected with the virus. [Read on for details.](#)

This Just In...

Negotiate Those High Medical Bills!

A 2021 Commonwealth Fund survey indicates that more than one-third of insured and half of uninsured adults reported a medical bill issue or were paying off healthcare debt. What many people don’t know is that they often can negotiate bills with their health-care provider or hospital.

[Read on for details.](#)

Travel Medical and Trip Insurance Policies

Most people assume that their domestic health insurance policy will take care of their needs when traveling in a foreign country. What they don't realize is that these plans are not designed for foreign travel. [Read on for details.](#)
